The Idea

Christine & John Collins - founders of the Bike Box Company - are both actively involved in the sport of Adventure Racing which involves cycling, paddling and running. One thing they do frequently is packing bikes into bike boxes - which can be a rather frustrating experience.

Seeing the need for a strong, lightweight, waterproof but inexpensive box, which leaves space in your garage for all the other toys - they came up with the Bike Box Design.

A safe Journey

Your bike is designed for the road or the trail, and you know it's up to the challenge. But how does it cope during air travel or with the bangs and bumps of a baggage carousel?

Our Bike Boxes and Bike Guards are designed and manufactured to be resilient and tough and to protect every part of your precious bike 100%.

Bike Guards

Our Bike Boxes come with protective inners to cover important components such as cassette, crank, rear derailleur, skewers and wheel hubs.

Box Size

A Bike Box has the main purpose to protect your bike during your travels - but once your bike has arrived safely at your destination the box has to be dealt with. Be it in a hired car, the hotel room, a garage or home. Storing a bike box requires a lot of space.

Folds into itself and uses 80% less storage space than other bike boxes!

	Large Box	Small Box
Assembled:	140 x 80 x 30cm	120 x 78 x 25cm
Stored:	83 x 77 x 7cm	76 x 67 x 7cm

Box Weight

The average weight of a standard hardshell bike box is approx. 12kg. Most airlines have a weight allowance of 23kg which you will easily exceed and will be left with an excessive surcharge fee at the check-in.

Half the weight of an average hardcover bike box!

Total weight: 6 kg and 5 kg respectively

Even a heavy bike won't exceed weight allowance of airlines

Box Strength

Another important thing is that your box is waterproof. Packing your bike into a cardboard box is not the solution - once the cardboard is wet it becomes soggy and soft and your bike is no longer protected.

Tough, resilient design & material keeps your bike 100% safe!

Our Boxes & Guards are made from Polypropylene, a material which is extremely strong and waterproof.

Box Price

Bike Bags and Cases come in all shapes and price ranges and choosing between a bike bag, a hardshell or a cardboard box has always been a compromise between weight, strength and price. Our Bike Box ticks all the boxes!

Our Bike Boxes are more economical

50% than the avg. bike bag

75% than the avg. bike case

low delivery costs due to reduced storage size and no extra luggage charges at the airport.
